

## PRESS RELEASE

# Norican Group Americas Expands LaGrange, Georgia Technology Hub

**NORICAN GROUP** is pleased to announce the expansion of operations at its LaGrange, Georgia Technology Hub. The facility, operated as the Wheelabrator Group Americas headquarters since 1987, offers manufacturing, inventory and logistics capabilities. The planned expansion will move all Norican North America business operations, including Wheelabrator, DISA, StrikoWestofen and Italtresse Gauss, into the LaGrange technology hub.

The company will ramp up current resources to meet commercial operations and administration requirements of all lines of business. Inside sales and customer support activities will join inventory and logistics centralized in LaGrange. The expansion will transfer the current operations of DISA in Oswego, Illinois and StrikoWestofen and Italtresse Gauss in Holland, Michigan to LaGrange.

“We see this move as an opportunity to improve our speed to serve customers and optimize order fulfillment with all capabilities in a single location,” said Mike Lewis, Vice President DISA & Aluminum Products. Norican will complete these expansions in the 2nd quarter of 2020.

### About Norican Group

Norican Group is home to four leading globally operating brands: Wheelabrator, DISA, StrikoWestofen and Italtresse Gauss. Together, they offer customers around the world a broad spectrum of solutions, spanning end-to-end grey iron foundry equipment, integrated light alloy castings solutions, high-end furnace technology, and surface preparation technology and services. ●
