The Compact Rotary Sorter That's Big on Benefits

THE COMPACT ROTARY SORTER by Profile Industries has all the benefits of its larger version.

"The need for a compact rotary sorter became clear when clients approached us about a rotary sorter for smaller lots such as research facilities, nurseries, and industrial manufacturers," said Steve DeJong, President of Profile Industries.

The Compact Rotary Sorter has the capability to sort vegetable seed, hemp seed, brassicas, and oilseeds along with ceramic beads, steel shot, and glass beads. Its compact design creates a centrifugal force to achieve a precise separation for the commodity from debris, foreign matter, splits, and misshapen items.

"We have been making a variety of sorting equipment for over 40 years. The Compact Sorter offers the same benefits as our larger volume rotary sorters just in a condensed version," added DeJong.

Profile Industries' goal is to manufacture sorting technology that the global agricultural community, agri-foods industry, and global industrial manufacturing can use to improve quality and reduce product loss.

Visit www.profile-ind.com or send an email to info@profile-ind.com for more information on the Compact Sorter or other Profile industries sorting equipment. ●
