Rapid Blast™ A New Blasting Abrasive

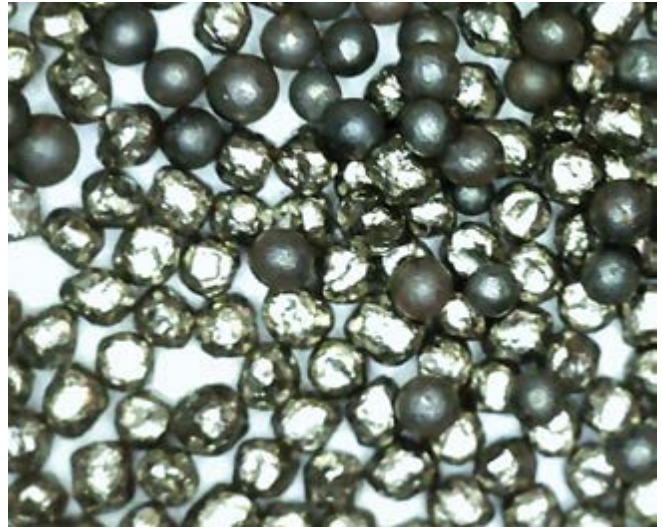

Frohn North America is offering the latest technology to improve shot blasting efficiency and cut blast cleaning costs.

The new Rapid Blast™ abrasive features:

- Cast shot and cut-wire blend in proprietary ratio
- Designed to reduce abrasive consumption by as much as 40% and increase blast cleaning efficiency
- Shorten cycle time by as much as 30%
- Savings in energy, labor, maintenance, wear parts and freight

As Rapid Blast™ is used and consumed, the ratio of cut wire shot in the operating mix will increase. This increased ratio of cut wire abrasive will clean parts faster than a 100% cast operating mix.

If today's prices of steel shot have you looking for alternatives, Rapid Blast™ may be the solution. If you need more blasting done in less time, Rapid Blast™ can help. Get the benefits of cut wire shot without the expense! ●
