

New Sinto Airless 3 cu. ft. Drum Blast Unit

SINTO AMERICA is excited to announce the newest addition to its drum blast product line—the DB-3 Series. The DB-3 joins the CNDR and CNDX in the drum blast line up for Sinto America.

The DB-3 is a 3 cu. ft. drum blast machine specifically designed to process small parts found in multiple industries. A unique design eliminates part jamming/part loss as all parts are contained in the drum during the blasting process and carefully dumped after the process to ensure no part loss. This DB-3 has a drum weight capacity of 300 lb and load height of 56" and discharge height of 40".

“This new addition to our blast equipment line provides a lower cost alternative for many applications. The DB-3 is currently the only 3 cu. ft. airless drum blast unit made in the USA that is available in the North American markets,” said Charlie Gorman, VP Sinto Surface Treatment.

The Standard Features of the DB-3 Series:

- 5 HP direct drive D-10 blast wheel
- Automatic AR500 dumping drum
- 480 V / 60 Hz / 3PH
- Pitless design
- VFD on drum
- PLC controlled
- Digital cycle timer

This model will also come with options for other industrial features such as: abrasive adder, hydraulic parts loader, discharge conveyor, airwash separator, rotary screen, manganese drum, VFD for blast wheel, shot trap, 10 HP blast wheel and 800 CFM dust collector.

Sinto is looking forward to extending its product line offerings to even more assembly process-based manufacturers and customers' various needs. These new offerings expand Sinto's foundry, automation, and surface treatment product lines.

About Sinto America

Sinto has long strived to be the leader in the design and manufacture for all foundry, metal finishing, and shot blasting applications. From standard to custom, simple or complex, or a single piece of equipment to a full system, that's the Sinto difference, your one-stop solution.

Sinto America, Inc. is the North American group holding company, of Sintokogio, Ltd., Japan. The Sinto group of companies has an international reputation for excellence in the foundry, manufacturing and surface treatment industry. Sinto America focuses on six primary markets: Foundry, Mold and Core Making, Sand Processing, Automation, Surface Technologies and Surface Treatment.

Sinto also provides contract blasting and precision shot peening services through our National Peening and Technical Metal Finishing divisions and cut wire abrasives through our Frohn North America division. Learn more at: www.sintoamerica.com. ●
