

the Wheelagram

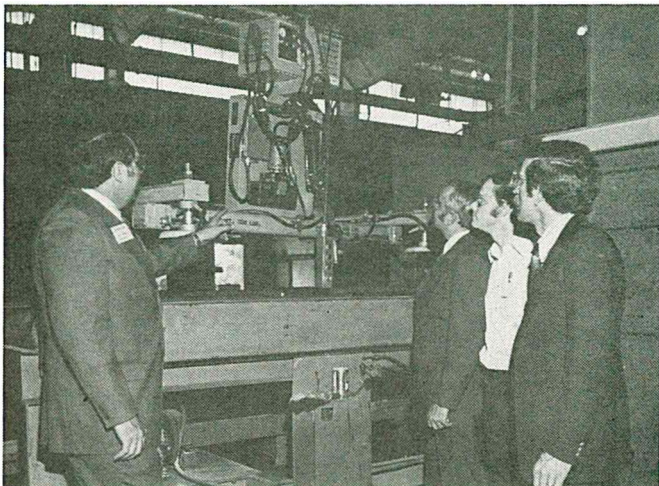

VOL. I NO. 5
MAY 20, 1977

IN OBSERVANCE OF MEMORIAL DAY, all departments will be closed Friday, May 27 through Monday, May 30.

ANOTHER SALE IN SAND RECLAMATION! Alloy Steel Castings Company, Southhampton, Pennsylvania, last week purchased a 96" Swing Table, including a complete Sand Reclaim System.

OFF TO MILWAUKEE this week were Duke Mallory, Manager, Technical Development-Marketing, and Alan VanHuffel, Product Manager-Portable Systems, to address the Wisconsin Sectional Regional Conference-National Association of Corrosion Engineers. Duke and Al discussed Steel Surface Preparation technology — emphasizing the development and use of the Blastrac systems.

WHEELABRATOR'S OPERATING & MAINTENANCE SCHOOL . . .

The second of four annually held O & M Schools was conducted early this week. Forty-four customers representing 21 companies attended the two-dayschool. Point of interest — these men are responsible for operating and maintaining 63 pieces of Wheelabrator equipment. During a plant and demonstration tour Gene Tarabek, Manager of Customer Service, points out the clean surface of a steel plate as it emerges from a horizontal plate cleaner.

FIRST OF A KIND . . .

Final check is given to Wheelabrator's Space Saver Table — better known as the SST — by (center) Joe Bidlack, Foreman, (l) Hermie Miller and (r) Bob Barsoda, Assemblers, before shipment to General Electric Company, Erie, Pennsylvania. The unique design features a space-saving rotating door which revolves within the blast cabinet. Loading and unloading operations of the 3700 mm (12 ft.) work table are done at the front of the rotating table. Noteworthy, too, this machine is our first to implement the metric system.

A GOOD SUPERVISOR, they say, is someone who can step on your toes without messing up your shine.

TIM BLAKE — Research Chemist, R & D — attended a No Bake Sand Seminar earlier this week at Penn State University, College Park.

CHET JARONIK, foundry foreman, was inducted into the Board of Directors, Michiana Chapter, American Foundrymen's Society, at their recent officers' dinner meeting.

CECIL R. DIETRICH, Steel Assembly Shop, informs us that his son John, a Wheelabrator Scholarship student at

(Continued on back page)

Wright State University, Dayton, Ohio, intends to complete his undergraduate work in Accounting by attending summer school and graduating in August. John, confined to a wheelchair as a result of an accident, attends Wright State instead of Purdue because Purdue does not have facilities for handicapped students.

WE GOT THE WORD . . . The goal of the division is to NOT allow metric to become hectic! With that thought in mind George McNeile, Export Technical Liaison Engineer, contributes:

We're on the ball
Following the metric call.
We're moving to metrics
Despite the problem with electrics.
Decision to go metrics
Is our belief in the esthetics.
We don't give a damn
We're going with litre-meter-gram.

CELEBRATING 15 YEARS of company service this week is Clarence T. White, Steel Shop. **HAPPY ANNIVERSARY!**

RAY GOOD, retired Machine Shop Superintendent, made his annual visit to the plant this week enroute to his summer home in Minnesota from his winter quarters in Florida.

TWO CATERPILLARS were crawling across the grass when a butterfly flew over them. They looked up, and one nudged the other and said: "You couldn't get me up in one of those things for a million dollars!"

INTENT UPON CARD PLAYING and, of course, conversation, are the gals who attended the **JULIANNA CLUB** annual card party held a week ago.

SIGN IN A FACTORY supervisor's office: "Caution — be sure brain is engaged before putting mouth in gear."

FROM THE WORLD OF GOLF . . .

DAWN LEAGUE — May 16 results — Individual Low Scratch-34 Cal Barnes; Low Team Scratch-79 (R. Hensel, C. Barnes).

TWILIGHT LEAGUE — May 9 and 11 results — Scores still holding — no new results to report.

THE DID YOU KNOW DEPT.? . . . Every man, woman, and child in the U.S. — some 255 million persons — uses more than three gallons of oil and nearly 250 cu. ft. of natural gas daily!

BEIGER JUNIOR HIGH SCHOOL youngsters toured our plant Wednesday. Paul Brower and Bill Shultz served as tour guides. Today seen touring with John Vaseline were young people from the Central Career Center, South Bend.

FORECAST . . . With our usual scientific accuracy we predict — continued warm and humid; increasing chance of showers and thunder storms, especially on Sunday.

Published weekly by and for employees of Materials Cleaning Systems Division.
