**Wheelabrator-Frye Inc.**

VOL. II NO. 7

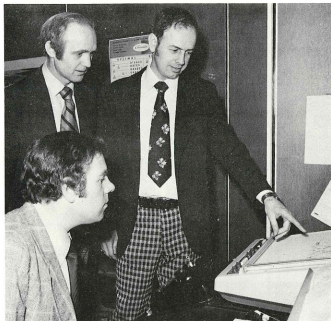

FEBRUARY 24, 1978

OUR CONTINUED COOPERATION IS NEEDED . . . We have been advised by I&M that they expect to be down to a 40-day stockpile of coal by this weekend. According to State Public Service Commission orders, commercial and industrial customers are required to curtail consumption by 25%, with possible additional mandatory curtailments when the stockpile reaches a 30-day supply.

In response to this mandate, the Company will achieve the necessary reduction by shutting down the arc furnaces in Plant II on one shift each day. The Company will make every effort to utilize the affected employees on other jobs.

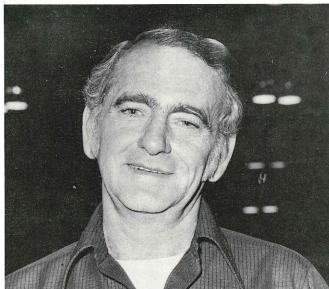

All employees who recently transferred temporarily to Plant II should report to their regular jobs on their usual shifts, starting with the third shift Sunday, February 26.

## MISHAWAKA'S WAY . . .

Trevor Green (seated), Manufacturing Engineer, Tilghman-Wheelabrator, England, was in Mishawaka last week to investigate our N/C Punching and Burning machine and to observe our manufacturing techniques in general. Mike Stout (right), Senior N/C Programmer, emphasizes a point to Trevor and Eric Dunnington, Supervisor, Production Engineering.

## 25 YEAR MARK . . .

Congratulations to Ralph Hensel who celebrates 25 years of company service tomorrow! Ralph is second shift Maintenance Foreman, Plant I.

## AUTHOR'S AWARD PROGRAM ANNOUNCED . . .

A new program designed to recognize employees who publish articles or speak on subjects relating to our business was recently announced by J. E. O'Callaghan, Division President.

The purpose of this program is to encourage all disciplines at MCSD in the authorship of speeches and articles to technical and professional groups — worthwhile activities which enhance the professional status of the author and our company.

The "Wheelabrator Author's Award" will be made to any employee on the recommendation of his or her supervisor, with a written draft submitted in advance to Carter Dreves, Manager of Public Relations.

The award will consist of a plaque engraved with the employee's name, suitable for wall display. Recognition of additional published works by the employee will be added to the award.

For further info contact Carter, ext. 221.

WASHING your clothes in cold water is more than just a gimmick for selling a particular detergent. It's a good way to save the cost and energy of heating up to 40 gallons of hot water for each washload.

SHOW-N-TELL . . .

Manned by Division personnel, our manufacturing story was told to area residents — with the aid of this attractive, informative display — at the Industrial Fair held recently at Century Center, South Bend.

Posted on the First Aid Station Window . . . CONSERVE ENERGY — electrical, that is!

NEW FACES . . . Welcome to MARILYN K. KLEIN, Blueprint Machine Operator-Engineering.

DO YOU have a habit of idling your car engine while waiting or chatting? Turn it off! You waste a cup of gasoline for every 5 or 6 minutes of going nowhere. Driving with unnecessary weight costs, too — 1% for every 50 pounds.

FOR CREDIT UNION MEMBERS . . . If you're interested in serving on the Credit Union Board or Credit Committee (two openings on each), contact one of the following members of the nominating committee: **Eddie Russell** (days) ext. 369, **Jerry Kinney** (nights) ext. 369, or **Sophie Kinney** (nights) ext. 369. ALSO, members who did not receive a copy of the Insurance Program coverage in their last quarterly statement, can now pick one up at their convenience at the Credit Union office.

WHEN YOU plug in your electric iron think of ten 100-watt light bulbs. Irons consume at least that amount of energy.

DON'T FORGET! . . . JA Trade Fair — tomorrow and Sunday, Scottsdale Mall; WFI Employees Federal Credit Union annual membership meeting Sunday, 1:30 P.M., First National Bank Branch, Main & Mishawaka, Mishawaka; Julianna Club Scholarship deadline is Wednesday.

ON THE SPORTS SCENE (IN MEXICO) . . . **Bob Riordan** reports that the Wheelabrator de Mexico Bowling League Round Robin Tournament was won by the Benitos who ran away with the league scoring 40½ points and 16,491 pins to out-distance the runners-up, David's Angels, who finished with 32 points and 15,474 pins. Members of the winning team are: **Aurelio Arteaga** (Sales Coordinator), **Ramiro Ponce** (Accounts Receivable), **Jesús Valdez** (Service Engineer) and alternate **Joaquín de la Torre** (Chief Accountant). Final standings were: 1) Benitos, 2) David's Angels, 3) Granallitas, 4) Super Tumbalasts, 5) TNT, 6) Chips, 7) Sprockets, 8) Heavy-weights, 9) Wheels, 10) Impellers. Bob goes on to say that the ten three-man teams play every Thursday evening at Boliche Satellite and visitors are welcome.

“. . . and we advise you to turn off your set to conserve energy . . . Please stay tuned for further announcements.”

Published weekly by and for employees of Materials Cleaning Systems Division.
