

the Wheelagram

VOL. III NO. 19

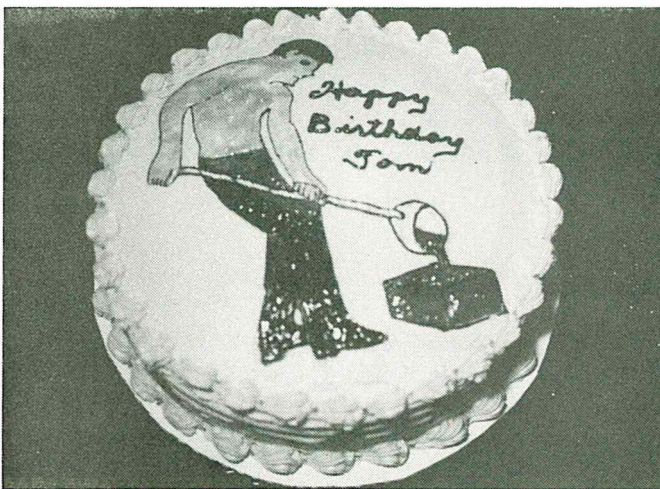

MAY 11, 1979

MELTER OF THE MONTH . . .

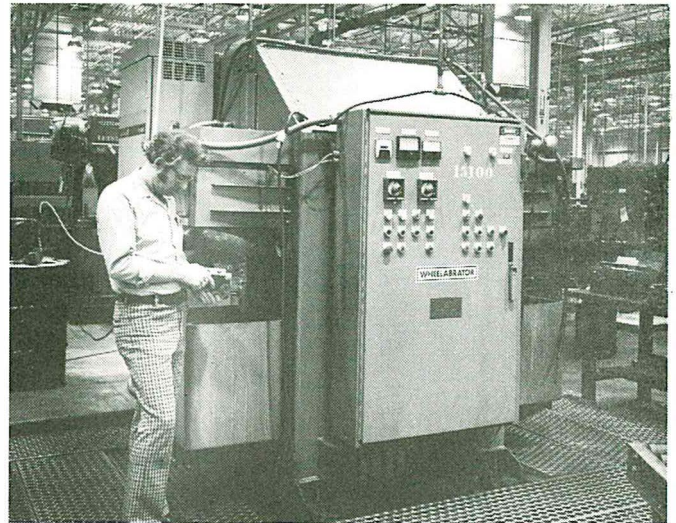

CHARLES "CHUCK" MANN, "Melter of the Year" for '78, was named March "Melter of the Month." Chuck is a second shift Melter with over 15 years of company service.

Celebrating 20 years of company service this week is **Darrell Austin**, Blacksmith-Steel Fabrication. Congratulations, Darrell!

WHAT COULD BE MORE APPROPRIATE? Central Region Secretary, **JUNE SMART** baked and decorated this cake for boss **TOM MOTT's** birthday May 7. (**MARIE DRAKE** tells us she couldn't understand why the print of "The Molder" was missing from the office wall. Little did Marie know it was June's artistic inspiration for this creation.) Belated birthday greetings, Tom!

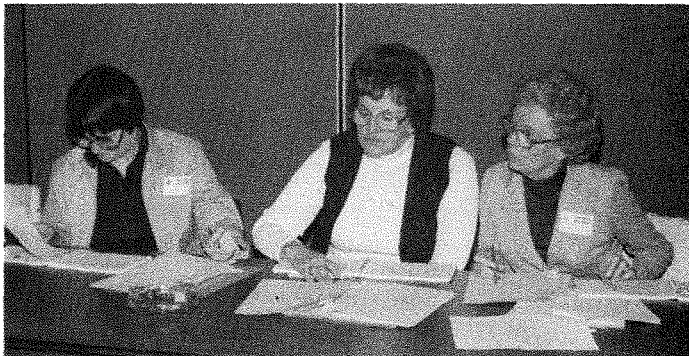

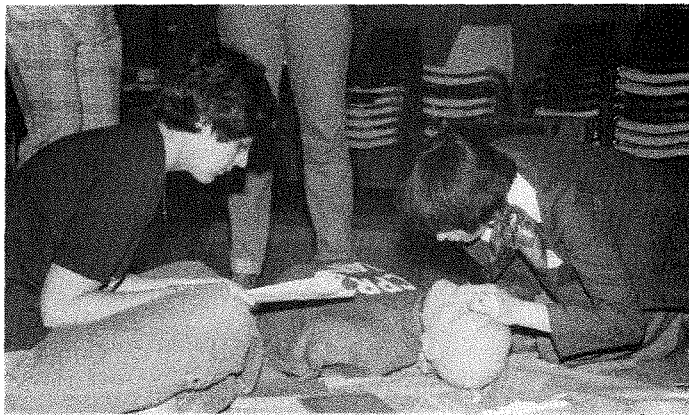

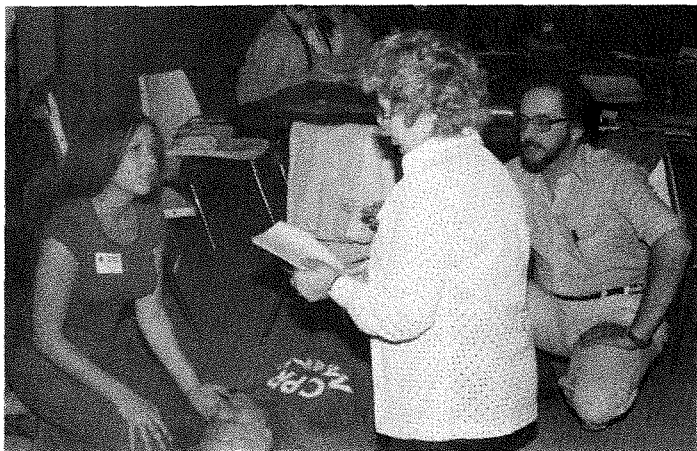

Internal cleaning and deburring of hydraulic valve and pump castings is being performed by a recently installed Wheelabrator OCFM (Orboresonant Cleaning and Finishing Machine) at Borg-Warner Corporation, Hydraulics Division, Wooster, Ohio.

The OCFM operates by submerging the work to be cleaned in an abrasive media mass. Work energy is created by oscillating a special beam, with the fixtured work attached, at its natural resonant frequency. The abrasive media will flow into internal passages and blind areas that cannot be reached by conventional methods.

Borg-Warner is reporting excellent results with a reduction in cleaning costs and cleaning time cycles. (Wheelabrator-Frye is currently the only manufacturer producing a machine that operates on the orboresonant principle.)

NEW FACES . . . Wheelabrator greets **Betty Sheneman**, Repair Parts Service Clerk-Stores; **Kathryn Sells**, Reproduction Machine Operator/Clerk-Engineering; **Orion Yeandel**, Sales Trainee-Export; **Terry Gaskill**, Senior Draftsman-Engineering; **David Kline**, Engineer. Welcome back to: **Lonny DeGraff**, Material Handler-Plant 2; **Ted Zielinski**, Development Engineer-R & D; **Daryl Garrett**, Spray Painter-North Shipping; **Jerome Walker**, Production Electrician-Assembly; **Francis Pugh**, Plasma Arc; **Randall Shellito**, Radial Drill; **Louis DeGraff**, Heavy Duty Shear; **James Batten**, Plant Laborer; **Gary Hermann**, Sheet Metal "A"; and **Kenneth Mitchell**, Sheet Metal "B" — all returning to Steel Fabrication.

CPR INSTRUCTION RECEIVED BY JULIANNA CLUB MEMBERS . . .

Twelve members of WFI's Julianna Club recently completed instruction in lifesaving CPR (Cardio Pulmonary Resuscitation). The classes were co-ordinated by **Dale Bressler** (Assembly) and conducted by **George Smith** (Machine Shop) and **Jim Smith** (Foundry), ably assisted by **LeRoy Danzy** (Maintenance-Plant 2) and **Jim Brown** (Foundry).

Anyone interested in participating (on their own time) in future classes, contact Dale Bressler or the Personnel Department.

"MOST OF ALL the other beautiful things come by twos and threes, by dozens and hundreds," wrote Kate Douglas Wiggin, "— but only one mother in the whole world."

The sentiment has been repeated in countless ways. And Mother's Day commemorates it further — Honor thy Mother, Sunday, May 13.

TROPHY TO REMAIN AT WFI . . . Taking the Annual WFI-Dodge Team Trap Shoot for the third year in a row earned WFI marksmen the right to bring the traveling trophy home to roost permanently. WFI sharpshooters include: **Jerry Pratt, Jim Haines, Dick Barton, Dean Bayman, T. C. Williams and Jim Flowers.**
