## REBAR SEMINAR HELD AT MCSD . . .

Fusion bonded epoxy coated rebar (reinforcing bar used in concrete construction) is now being specified for use in virtually all new and repair construction of bridge decks.

The reason? — salts seep into the concrete, the rebar rusts and expands, the concrete pops up and — potholes, a national, multi-million dollar problem.

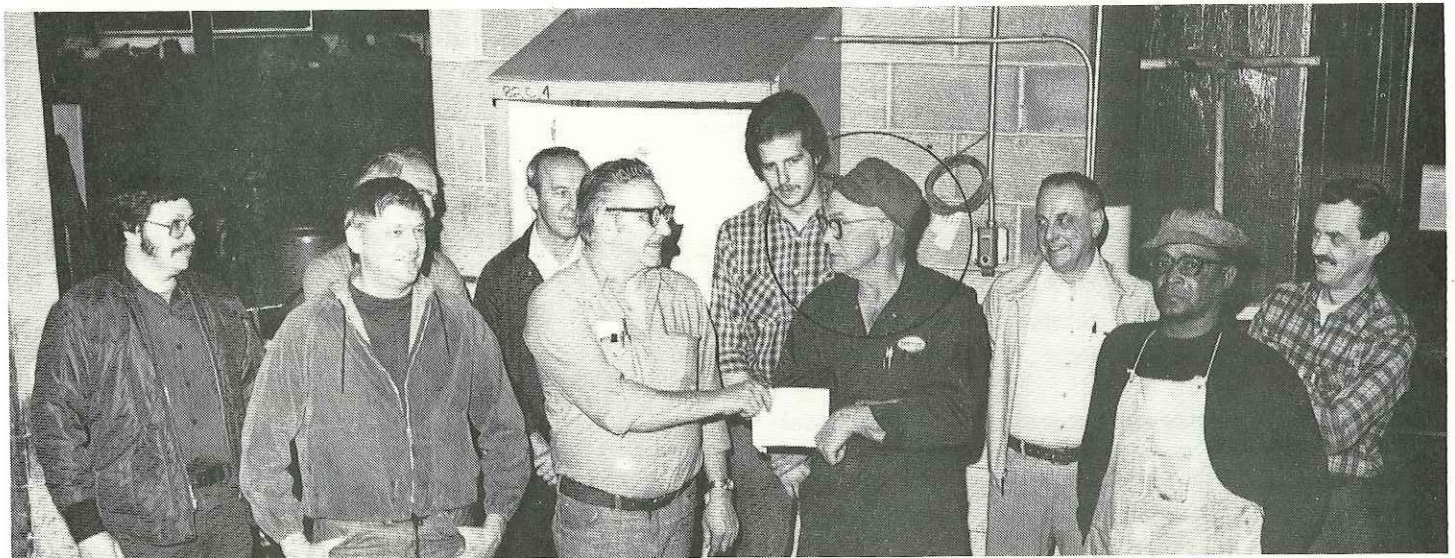

MCSD hosted a group of representatives from Armstrong Products, Warsaw, Indiana, one of the leading manufac-

turers of the epoxy coating powder, to acquaint them with centrifugal blast cleaning processes — all rebar must be blast cleaned prior to coating.

Examining sections of rebar blast cleaned with various abrasives. Fred Baldauf, Industry Manager-Transportation, Bill Baldwin, Manager Marketing Development, Armstrong Products, and "Duke" Mallory, Manager, Technical Development-Marketing.

## BEST WISHES AND GOOD LUCK, KEN!

Second shift Maintenance co-workers gathered to bid **KENNETH GAMBLE** farewell on the occasion of his retirement from Wheelabrator. Ken, Millwright-Maintenance Plant 1, retired Monday with 10 years of company service. To Ken, our best wishes for a long and happy retirement!

## CIRCLON VIBRATORY FINISHING MACHINES . . .

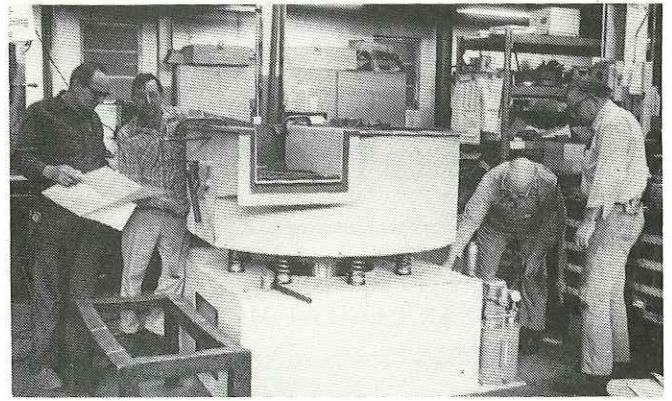

Wheelabrator's latest entry from the Precision Finishing Products Division is the Circlon line of round bowl vibratory finishing machines. Dubbed "the Outproducers" the Circlon is the latest Wheelabrator design in high performance vibrators and represents the culmination of a team effort by Engineering and Production Personnel.

This week two Circlon models were shown at the Society of Manufacturing Engineers Tool Show in Detroit. The machines, painted in a unique color combination of cream, orange, and black gave an impressive showing of clean design and styling. Early reports from the show indicate a high degree of interest in the Circlon in what appears to be another successful product for the Materials Cleaning Systems Division of Wheelabrator-Frye.

**CONGRATULATIONS** to **Richard Halterman**, General Order Filler & Checker-Stores, who marks 20 years of company service today!

**SPEAKING OUT . . .** Fred Baldauf, Industry Manager-Transportation, addressed the Earthmoving Industry Conference, a division of SAE, in Peoria, Illinois last week. Fred talked to the manufacturers of earthmoving equipment on the subject of Peening — An Added Dimension.

Carl Zimmer, Director of Personnel, was a featured speaker at the recently held annual leadership dynamics seminar sponsored by the South Bend Jaycees. Carl spoke on the Function and Management of the Corporate Personnel Department.

Final assembly and finishing touches on the Circlon show machines are being completed by (l to r) Lee Forea, Chuck Wagner, George Gay, and Bob Barsoda.

Tom Lentine, Roger DeLoof, and Bob Watts complete preparations on the Circlon prior to the S.M.E. Tool Show in Detroit.

LET'S SEE THAT AGAIN . . .  
AND AGAIN . . . AND AGAIN . . .

Xerox, I.B.M. and other companies in the instant copier/printer industry, as a group, represent the single largest user, by dollar volume, of Wheelabrator steel abrasives. The steel shot is used as an ink carrier in the instant reproduction process.

Wheelabrator-Frye Inc., is the nation's largest supplier of steel abrasives to the instant copier/printer industry. Quality, availability, and service are the major reasons for our success in this market.

Published weekly by and for employees of Materials Cleaning Systems Division.
